Melissa, et. al.,

The attached letter and JFOS email transmittal record address the necessary extension of Ravi's CERCLA JFOS work onto the Plant 2 property. As discussed with your team (Robbie and Bernie) and Ravi, we request your parallel review and approval of the JFOS work plan - to the extent it affects matters of interest to the Plant 2 RCRA Order.

CERCLA requires in this instance that certain JFOS work must start by September 17. A second phase, which I suggest is of greater significance to the Plant 2 RCRA process, will begin next year warranting my further coordination with you then.

Please let me know if you are not able to access the work plan in the attached email file. I will also send a paper copy of the work plan to your Seattle address this week, attention Robbie.

In the meantime, please let us know of any questions, and thank you for working with Ravi on a joint work plan review, comment (if any) and approval process.

Good afternoon, Ravi, and welcome back from your travels.

On behalf of Jorgensen Forge and Boeing, SoundEarth is submitting the attached CMP Work Plan for the JFOS project, for EPA review and comment. Your timely review and response is requested, in order to meet the deadline for initiating fieldwork in mid-September.

The CMP Work Plan can be downloaded from this link between now and August 28. Please let me know if you have any difficulty accessing the file:

JFOS3\_CMP Work Plan\_20150814.pdf

I will follow up with two hardcopies for EPA's records, which should arrive next week.

Regards,

Dee

Deborah Gardner, L.E.G., L.H.G.
